**DETAILED ACTION**

Claims 1-5 are pending examination on the merits.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 provides for the use of a composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 3 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1616

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Feucht et al. (US 2005/0003963) in view of Ziemer et al. (US 2003/0078167).

#### Applicant's Invention

Applicant claims a composition comprising (a) formula (I):

(I)

; (b) one or more compounds selected

from the following:

Art Unit: 1616

: and optionally, (c) a crop plant tolerance promoter compound, preferably benoxacor, mefenpyr-diethyl, fenchlorazole-ethyl, isoxadifen-ethyl, cloquintocet-mexyl, and N-cyclopropyl-4-[(2-methoxybenzoyl)amino]sulfonyl]-benzamide.

Applicants also claim a method of controlling unwanted plants by using the composition and a process of producing the composition by mixing the composition with surfactants and/or extenders.

**Determination of the scope and the content of the prior art**

**(MPEP 2141.01)**

Feucht et al. teach herbicidal compositions comprising (a) formula (I); (b) at least one known herbicide and (c) a safener (abstract, Table 1, Example I-2). The herbicide may be a benzoylcyclohexanedione, such as sulcotrione [0016 and Table 2]. The safener may be benoxacor, mefenpyr-diethyl or isoxadifen-ethyl [0018]. The compositions can be used to treat weeds of various varieties [0043]. The formulations are produced by mixing the compounds with extenders and/or surfactants [0064].

**Ascertainment of the difference between the prior art and the claims**

**(MPEP 2141.02)**

Feucht et al. do not teach the specific compounds (b). However, sulcotrione, a benzoylcyclohexanedione, is taught to be used as compound (b). It is for this reason that Ziemer et al. is joined. Ziemer et al. teach that benzoylcyclohexanediones, including the specific compounds (b), are used as herbicidal crop protectants (abstract, Table I: Formula H2, H4, H7 and H8).

**Finding of prima facie obviousness**

**Rationale and Motivation (MPEP 2142-2143)**

It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the teachings of Feucht et al. and Ziemer et al. to utilize the specific compounds (b). One would have been motivated to include these compounds because Ziemer et al. teach that the compounds are benzoylcyclohexanediones with herbicidal activity. It would be *prima facie* obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose in order to form a third composition that is to be used for the very same purpose; the idea of combining them flows logically from their having been individually taught in prior art." In re Kerkhoven 205 USPQ 1069, (C.C.P.A. 1980). Thus, combining the specific compounds (b) with the composition taught by Feucht et al. is obvious.
